

2009 YEAR END REPORT

As we reflect on 2009 and move into 2010 it is clear that people are interested! They are interested in food, health care, the environment, the economy, and our collective ability to make positive change. With the breadth of issues that intersect food systems and sustainable agriculture, it can be overwhelming to keep track of how all of this ties together and where each of us fits in the puzzle.

Luckily, SAFSF continues to forge unique conversations and action between seemingly disparate sectors to help balance the big picture and the details. We believe that improving our understanding of the ways in which action in one discipline directly impacts outcomes in another will lead to more holistic, lasting, and sustainable change.

*"It is apparent that this is a community of funders who are learning from each other and doing more collectively than they can do alone."
-Call Participant*

STAFFING

SAFSF expanded our staff this fall by 50%, hiring Bridget Dobrowski as our Program Assistant. With a Master's in Environmental Science and Management from the Bren School at the University of California, Santa Barbara, Bridget brings knowledge, excitement, energy, and many significant talents to our network.

SAFSF STEERING COMMITTEE

The 9-member Steering Committee provides strong leadership for our network. Staff would like to offer special thanks to the Co-chairs, both outgoing (Bruce Karmazin and Bruce Hirsch) and incoming (Greg Horner and Gerry Wang) for their additional service. Members are:

Since January 2009 SAFSF has welcomed 11 new members ranging from individual donors, small family funds, and community foundations, to large private foundations. Several of our newest members are actually long-term actors in the food/ag world. Others have come to the work and/or to the network relatively recently. All are welcome!

Membership applications are accepted on a rolling basis throughout the year. If you are interested in finding out more please contact *Virginia Clarke* at vclarke@safsf.org.

SAFSF FINANCES

Given the rise in interest in our issues and growth in membership, SAFSF has been remarkably fortunate to have been spared the financial difficulties and strains which are affecting too many of our colleagues. That said, given the economic uncertainties, SAFSF's leadership continues to maintain careful financial oversight and looks to grow our programs and services within a prudent budget.

A LOOK AHEAD

MEMBER SURVEY RESULTS

SAFSF will host a member call in February to share your thoughts and suggestions for how we can strengthen our programs and services.

STUDY GROUPS

We'll be testing a new model for communication within this funder community. Think of it as 'study groups' meets 'social networking'; the theory is that the funders represent a huge resource to each other, and that this resource is not easy to access. The hope is that study groups will be useful to some of us, and that combining conference calls and online communications can make for a richer dialogue. These will be launching in early 2010 - stay tuned!
